before the coming of europeans aboriginal communities lived within territories defined by complex ritual cycles of song dance symbol and ceremony knowledge of these boundaries and frontiers was in the keeping of senior custodians in traditional communities this continues to be the situation today white australians belatedly

acknowledge aboriginal land rights and the special significance of sacred sites this makes an understanding of the boundaries vital to the achievement of basic land and sea rights for aboriginal people unfortunately over much of the continent knowledge of boundaries has been lost or is in danger of being lost in this work two political geographers explore the nature of aboriginal boundaries and their contemporary implications in four detailed case studies they challenge many of the assumptions which have underpinned the involvement of white advisers the result is a timely study which raises important questions about an issue of national significance

the dispossession of indigenous peoples by conquest regimes remains a pressing issue this book unlike most other books on the subject contrasts two different colonial administrations first the chinese qing empire then from 1895 the japanese it shows how under the chinese legal system the qing employed the chinese legal system to manage the relationship between the increasing numbers of han chinese settlers and the indigenous peoples and how although the qing regime refrained from taking actions to transform aboriginal land tenure nevertheless chinese settlers were able to manipulate aboriginal land tenure to their advantage it goes on to examine the very different approach of the japanese colonial administration which following the meiji restoration of 1868 had begun to adopt a western legal framework demonstrating how this was intentionally much more intrusive and how the japanese modernized legal framework significantly disrupted aboriginal land tenure based on extensive original research the book provides important insights into colonisation different legal traditions and the impact of colonial settlement on indigenous peoples

this book examines whether australia s constitution should be reformed so as to enable the country to fulfil its obligations under the united nations declaration on the rights of indigenous peoples which it ratified in 2009 the book surveys the history of the constitutional status of australia s indigenous peoples from the time of colonisation through to the current debate on indigenous constitutional recognition however it argues that the term indigenous constitutional recognition implying that mere acknowledgement of the existence of indigenous peoples is sufficient to meet their legitimate expectations misrepresents the nature of the project the country needs to engage in the book argues that australia should instead embark upon a reform programme directed towards substantive and not merely symbolic constitutional change it argues that only by the inclusion in the constitution of enforceable constitutional rights can the power imbalance between indigenous australians and the rest of society be addressed taking a comparative approach and drawing upon the experience of other jurisdictions the book proposes a comprehensive constitutional reform programme and includes the text of constitutional amendments designed to achieve the realisation of the rights of
