this book analyses the roots and evolution of the concept of sustainability in Europe and the European Union as sustainability has always mirrored certain value judgments on justice and priorities it is suitable for functionalist analytical contextual and historical comparisons via multidisciplinary studies combining various branches of the social sciences law philosophy and economics the aim of this book is to explore the roots and evolution of sustainability so as to reveal how a European style of sustainability has emerged one that is inextricably linked to our civilization and history it identifies linear and cyclical phases with clear trends toward expanding the reach of sustainability its subjects and their duties the book offers a multidisciplinary chronological and contextual overview of the evolution of sustainability until the 21st century while also addressing its legal regime sustainability has many faces and needs to be approached in a dynamic manner through the lens of sustainable development or via a multi stakeholder model that includes private subjects and corporate social responsibility although primarily intended for an audience with an advanced background in law economics and philosophy the book will also benefit a more general audience particularly those who want to learn where the current sustainability concerns and legal regime actually came from

challenges on the path toward sustainability in Europe offers a theoretical and empirical approach to addressing sustainable development providing rich data analysis at cross country level as well as practical examples from the European context

evaluating sustainable development is becoming increasingly important in policy making evaluation practice and the scientific world in general however at present there is neither a generally accepted set of measures and evaluation methods nor specific standards to be met sustainable development in Europe addresses these issues and presents an important and concise analysis of state of the art sustainable development evaluation policies programmes and projects currently at work in Europe

the book provides knowledge of sustainable marketing tools in SMEs operating in the industry

this volume contains an open access chapter this book provides a comprehensive understanding of the sustainability of health systems in Europe furthermore it includes an introduction on how EU action in supporting health care policies in the EU member states both looking at implemented actions and describing current priorities for the future

this book argues that the european social model can only be sustained in the current economic crisis if social and employment policies are adequately recognised as integral parts of european economic policy making the contributing authors investigate

frontiers in sustainability welcomes researchers from around the world to contribute to a special edition research topic emphasizing the crucial role of global collaboration in driving scientific progress in sustainability this initiative aims to showcase the cutting edge developments in sustainability on a global scale underscoring the academic excellence and impactful contributions of internationally recognized researchers this collection seeks to illuminate recent advancements spanning the entire spectrum of sustainability with a specific focus on research conducted in europe by assembling diverse perspectives the goal is to provide a comprehensive overview of the achievements and challenges encountered by researchers working collaboratively across borders contributions from researchers in the humanities are particularly encouraged recognizing the interdisciplinary nature of sustainable development we welcome a variety of contributions including original research articles comprehensive review papers perspectives that offer unique insights and opinion pieces that stimulate thoughtful discourse the emphasis is on fostering an inclusive dialogue surrounding the accomplishments and obstacles within the sustainability domain specifically within the european context authors based at european institutions are encouraged to submit their work and we also extend an invitation to researchers affiliated with non european institutions submissions from the latter group will be assessed on a case by case basis reflecting our commitment to promoting a diverse and globally collaborative perspective on sustainability potential topics to explore include sustainable consumption and production exploring initiatives to change consumption levels and shorten supply chains circular economy practices investigating the adoption and impact of circular economy principles in european industries including how these contribute to the energy transition climate change adaptation and resilience assessing innovative approaches and policies aimed at mitigating climate change effects and improving climate resilience social equity in sustainability investigating the intersection of sustainability goals with social justice and equity considerations resource reduction examining innovative ways to reduce non renewable resources adopting more sustainable alternative materials and safe and sustainable waste disposal authors are encouraged to explore these topics and related areas contributing to the global discourse on sustainable practices and strategies by uniting researchers from diverse backgrounds this research topic aims to inspire collaborative efforts that address the complex challenges facing our planet

comparative research on action to achieve local sustainable development in 11 european countries the most broad

based and systematic study of local agenda 21 ever produced invaluable case studies and analysis for the future on achieving local sustainability the book presents detailed comparative research into the implementation in 11 european countries of local agenda 21 the action plan for sustainable development at community level overviews of implementation in each country are accompanied by analysis of positive and negative changes as well as a comparative analysis with high academic and policy relevance numerous practical examples are included of best cases and crucial barriers highly relevant for preparations for the earth summit planned for 2002 the volume is directly relevant to political scientists and sociologists working on political change and governance issues

based on empirical studies of european energy and environmental policies this book suggests that in combination these two policy fields form a consensus in the eu which might also become the basis for a new european ideology namely european sustainabilism it asks why an environmental conscience has grown since the late 1960s in the industrialised world and shows that whilst there is undeniable environmental degradation during this time and that a european environmental conscience has mainly developed through successive steps of european integration in energy policy in this connection between energy and the environmental we find one driver for european integration and indeed european identity if sustainabilism should become a european ideology it will substantially influence the way future europeans will live this book will be of key interest to scholars and students of european studies international relations political science history economics sustainability studies environmental and energy policies in europe

this volume is the fourth instalment of the report on the state of the european union series its shows that if the eu does not want to be ruled by crisis any longer it must invest in sustainability political economic social and environmental europe must turn this elusive and ever threatening crisis into a chosen and meaningful transition

first published in 1998 routledge is an imprint of taylor francis an informa company

this book analyses the evolution of the sustainability discourse in the european union exploring the conditions necessary for sustainable development to move from a conceptual model into a model for action for strategic decision makers at all levels of governance this book questions the extent to which the discourse on sustainability has become embedded into governance structures in europe it focuses on the importance of the nature of the language of the political discourse on sustainability and how ideas are communicated amongst the actors and stakeholders in

the policy making process as well as assessing the conceptual political institutional and operational barriers apparent across the european geographic region drawing case studies from numerous policy areas including climate change eu emissions trading scheme renewable energy nuclear energy the european integrated energy market transport mobility and environmental protection expert contributors unveil a narrowing of the discourse on sustainability that has taken place in europe however a considerable discontinuity remains between the economic and environmental objectives of sustainable development and the authors argue that it is essential that conditions for a dynamic discourse open to multiple participants are developed sustainable development and governance in europe will be of strong interest to students and scholars of comparative politics governance sustainable development and environmental politics and studies

contains important reports on the economic situation and development including broad economic policy guidelines and its implementation report economic forecasts for spring and autumn public finance report and the eu economic review

the book provides a comprehensive overview of the european sustainability model which cannot be properly understood without taking into account the global governance trends surrounding the topic the author offers a fresh analysis of both theory and praxis of sustainable development in the open ended process of eu integration by shedding new light on the often overlooked role that law and legal science should have within the educational and cultural domains the monograph explores the necessity of new conceptual and methodological approaches in order to understand the emerging educational and cultural challenges when it comes to their integration and intersection with sustainability in today s society which desperately claims systemic transformations

europe in figures is for and about europeans this edition provides a wealth of harmonised and comparable data on the european union the euro zone and the eu member states with additional statistics for major non european countries

based on the proceedings of the conference board europe s forum on environmental management hosted by the international academy of the environment on april 30 1993 p 4
